# Alaska State Literacy Team

## **Birth to Kindergarten**

- Abbe Hensley
- Sarah Kuenzli
- Alyse Galvin
- Paul Sugar
- Carol (Bunny) Schaeffer

Best Beginnings  
Early Childhood/Head Start  
Partnership Liaison, EED  
Early Learning, EED  
NW Arctic Borough School District,  
State Board of Education and Early Development

## **Kindergarten to Grade 5**

- Jennifer Knutson
- Nita Rearden
- Phil Loseby

Anchorage School District  
Lower Kuskokwim School District  
Juneau School District

## **Grade 6 to Graduation**

- Kathy Moffitt
- Kathy Nielson
- Dr. Peggy Marciniec
- Sandra Kowalski
- Linda Thibodeau

Mat-Su Borough School District  
Juneau School District  
Alaska Pacific University  
Fairbanks North Star Borough School District  
Alaska State Librarian

## **Facilitators:**

- Lexie Domaradzki
- Nancy Garten

REACH Education Consulting  
REACH Education Consulting

## **Technical Assistance:**

- Les Morse
- Cynthia Curran
- Theresa Deussen
- Rhonda Gardner

Deputy Commissioner, EED  
Director, Teaching and Learning Support, EED  
Researcher, Education Northwest  
Accountability Plus Education Consulting

## Executive Summary

We often hear it said that we live in the “information age,” with unprecedented levels of access to all kinds of information in many different formats. An important task of schools in the 21<sup>st</sup> century is to prepare children—all children, regardless of their background—to live, work, participate in society and pursue personal fulfillment in the midst of this busy world of ever-present information. The Alaska Birth to Graduation State Literacy Blueprint was designed to ensure that all children learn how to read and write at a high level; to access, synthesize and evaluate information; and to communicate effectively. Additionally, the blueprint will also ensure that all students can meet the rigorous curriculum requirements of the Alaska Performance Scholarship.

This blueprint focuses on the development of children’s literacy from birth to graduation. During the development of the blueprint, the state literacy team working on it often noted that literacy is only one of many things that are important for the growth of a healthy child. The focus on literacy in no way minimizes children’s other needs, such as for stable caring relationships, for safe physical environments, for adequate nutrition, and for appropriate medical care. This is one crucial piece of a larger picture.

Creating a blueprint that addresses both the early years, from birth to school entry, as well as the years in K-12 schools, presented an array of challenges to the state literacy team. It is one thing to create a blueprint to guide the work of public school teachers and administrators, but something else to also address the goals and needs of the many people who care for Alaska’s infants, toddlers and preschoolers. The team has attempted to do both. It provides guidance to policymakers, district, school and community leaders, as well as educators and families about what is needed in five broad areas: instruction and intervention, a comprehensive assessment system, family and community connections, leadership, and professional development.

**Instruction and Intervention:** In recent years, the base of research on effective literacy instruction has grown substantially. This blueprint moves away from philosophical debate to focus on approaches that have been shown in research studies to support children’s literacy development. This includes specific content—oral language and vocabulary development, phonological awareness, phonics, fluency, reading comprehension, and writing. It also includes effective pedagogy – that is, ensuring that children receive explicit and systematic instruction in reading and writing skills. For students who struggle with the development of these skills, it also means the provision of interventions that directly address their specific needs. Instruction is designed to be engaging and to respect the students’ cultures and interests. For older children moving into adolescence, effective literacy instruction means moving beyond “how to read” to helping students learn the different ways that reading and writing looks in their different subject areas—from lab reports in biology to expository essays in history.

**Comprehensive Assessment System:** Assessments of literacy are crucial, not in order to “give students a grade,” but instead to provide accurate, timely information to teachers, schools, districts, and programs about what children have learned and where they still need support to develop their literacy. A comprehensive assessment system *screens* children to efficiently find out who might be struggling, *diagnoses* the source of those struggles, *monitors* the progress of children as they develop reading and writing skills, and *evaluates* the effectiveness of literacy programs. It is important for educators, parents, and community members to have a clear sense of the purpose of different assessments and to have access to the information they need to properly support children’s literacy. This blueprint lays out the type of assessments that are needed and provides guidelines for their administration, as well as for the thoughtful use of assessment results.

**Leadership:** The implementation of a high-quality literacy initiative requires high-quality leadership at multiple levels. At the state level, the State Board of Education & Early Development approves the teacher preparation and certification programs that produce the professionals who will educate Alaska’s children. The Alaska Department of Education and Early Development works collaboratively with statewide agencies and consortia to ensure the effective implementation of the Alaska Birth to Graduation State Blueprint and literacy initiatives in schools and districts. At the state, district, and school level leaders do four important functions: they define and focus on the priorities that shape the organizational culture, they ensure that adequate resources are available, they ensure that the different parts of the system are coherent and aligned with one another, and they build the capacity of individuals in their organization to do their jobs effectively.

**Family and Community Engagement:** Schools do not educate children in a vacuum; on the contrary, children are always learning from their home and community environments as well. The best academic outcomes arise when children’s families and educators interact and communicate regularly about children’s literacy development. Therefore, the blueprint includes components of outreach to families, the creation of literate environments, the support of primary language and home culture, and connections to community, university, and business partners.

**Professional Development:** To continue to grow in their professional roles, educators need access to high-quality, on-going professional development that is directly relevant to the work they do with children. Professional development should occur at all levels of the educational system. Families are a child’s first teacher, and opportunities for learning about early literacy development should include families, childcare providers, and community members as well as professional educators. The delivery of professional development should promote collaborative work and create professional conversations about children’s literacy. The content of professional development needs to be research-based and focused on the literacy needs of children, as well as on the effective use of assessment data to understand those needs.

# Instruction and Intervention

**Vision:** Beginning in infancy, children have many opportunities to interact with adults and other children in ways that build their oral language skills. Children also have many opportunities to playfully explore and learn from their surroundings. As they get older, they are exposed to written language in many forms, and adults in many settings provide children with opportunities to play with oral and written language. In the blueprint, adults are identified as parents, caregivers, extended family, teachers, or anyone acting as a teacher. As children move into school, they receive explicit and systematic instruction in reading, writing, listening, and speaking skills. If children struggle with the development of skills, they receive interventions that directly address their needs. Instruction is designed to be engaging and to respect the students' cultures and interests. To that end, adults provide culturally relevant opportunities for children to write, discuss, and speak for a variety of purposes in the learning environment.

## Quick View of Instruction and Intervention:

Adults (identified as parents, caregivers, extended family, teachers, or anyone acting as a teacher) provide instruction and opportunities for learning for young people as is age and skill appropriate.

The content of this instruction addresses the following areas:

- Oral language & vocabulary
- Print awareness
- Phonological awareness
- Letter knowledge & phonics
- Fluency
- Comprehension
- Writing
- Disciplinary literacy

Within the blueprint, the delivery of instruction takes the following forms and characterizations:

- Designated literacy instruction time
- Explicit and systematic instruction in reading and writing
- Modeling and scaffolding of instruction
- Intentional differentiation and grouping
- Student participation, motivation, and engagement
- Meaningful selection of instruction materials
- Use of technology
- Incorporation of the student's primary language other than English

The blueprint provides for interventions, as necessary, in the following areas:

- Language development
- Reading
- Writing

<b>Birth to Kindergarten</b>	<b>Kindergarten to Grade 5</b>	<b>Grade 6 to Graduation</b>
<b>Content of Instruction</b>		
<p><b>Oral Language &amp; Vocabulary</b></p> <ul style="list-style-type: none"> <li>Adults share words, songs, and oral and written stories, with an emphasis on stories of a child's family, community, and culture(s).</li> <li>Adults read and re-read books aloud which cover a broad range of interests, content, and information. Adults engage children in discussions and activities related to what has been read as well as provide direct explanations of specific word meanings from the books to enhance vocabulary.</li> <li>Adults find or create language and literacy activities that reflect the child's interest, culture and home language, and present them so the child is able to playfully explore and investigate the area of interest.</li> <li>Adults enhance oral language and vocabulary by introducing new words in context of daily activities and by narrating what the child is doing (parallel talk) along with what the adult is doing (self-talk).</li> <li>Adults build oral vocabulary by verbally labeling items (ages 0-3).</li> <li>Adults build vocabulary by providing verbal and written labeling of surroundings (ages 3-5).</li> <li>Adults deepen children's oral conversational skills through longer, more complex oral and written stories and by having many opportunities for child-initiated conversations.</li> <li>Adults provide numerous opportunities for children to ask and answer questions</li> </ul>	<p><b>Oral Language &amp; Vocabulary</b></p> <ul style="list-style-type: none"> <li>Teachers provide all students explicit instruction in oral language. <ul style="list-style-type: none"> <li>Teachers respectfully distinguish differences between conversational language use and standard academic English and provide guidance in the appropriate use of each.</li> <li>Teachers provide students instruction in the meaning of unknown and multiple-meaning words and phrases, understanding of figurative language, word relationships, and nuances in word meanings.</li> </ul> </li> <li>Teachers provide vocabulary instruction with a focus on academic language. <ul style="list-style-type: none"> <li>Teachers provide instruction in specific words and concepts to help students develop depth of word knowledge.</li> <li>Teachers provide instruction in independent word-learning strategies (e.g. morphemic analysis, external context clues) to help students determine the meaning of unfamiliar words encountered when reading.</li> <li>Teachers provide opportunities for extended conversation, both during reading instruction and during the rest of the school day.</li> </ul> </li> <li>Teachers provide instruction in the conventions of standard English grammar and usage for speaking.</li> <li>Based on identified needs of learners,</li> </ul>	<p><b>Oral Language &amp; Vocabulary</b></p> <ul style="list-style-type: none"> <li>Teachers provide all students explicit instruction in using oral language, including forms such as debates, speeches, and story-telling, as well as disciplinary-specific ways of talking about ideas and issues.</li> <li>Teachers respectfully distinguish differences between conversational language use and standard academic English and provide guidance in the appropriate use of each.</li> <li>Teachers of all subjects consistently provide explicit vocabulary instruction: <ul style="list-style-type: none"> <li>Teachers dedicate a portion of regular classroom lessons to explicit vocabulary instruction.</li> <li>Teachers provide repeated exposure to new words in multiple contexts, and allow sufficient practice sessions in vocabulary instruction.</li> <li>Teachers give sufficient opportunities to use new vocabulary in a variety of contexts through activities such as discussion, writing, and extended reading.</li> <li>Teachers provide students with strategies to make them independent vocabulary learners, such as building knowledge of root words and suffixes and teaching students to use glossaries.</li> </ul> </li> <li>For ELLs, teachers provide additional oral language practice, focusing on academic</li> </ul>

<b>Birth to Kindergarten</b>	<b>Kindergarten to Grade 5</b>	<b>Grade 6 to Graduation</b>
<b>Content of Instruction</b>		
<p>about the world around them.</p> <ul style="list-style-type: none"> <li>• Adults promote an environment that engages children in reciprocal conversations and cooperative play with peers, singing, telling and following directions, describing, playing with sounds and words, creating imaginative stories, drawing or writing their own stories.</li> <li>• Adults model and encourage the use of words that represent abstract ideas such as love and respect.</li> <li>• Adults engage children throughout the day in a variety of playful, interactive activities using materials and practices that are research-based and that are aligned with the Alaska State Early Learning Guidelines.</li> </ul>	<p>teachers provide ELL students with additional oral language practice, focusing on academic language rather than basic communication skills. Beyond the vocabulary instruction in the regular classroom, teachers teach ELLs about words with multiple meanings, use visuals and graphic organizers to help convey meaning, provide additional review of vocabulary, and work with shared cognates, when appropriate.</p> <ul style="list-style-type: none"> <li>• Based on the identified needs of learners, teachers provide ELL students with structured opportunities to use language in ways that promote accurate grammar and syntax in meaningful contexts.</li> </ul>	<p>language rather than basic communication skills. Beyond the vocabulary instruction in the regular classroom, teachers teach ELLs about words with multiple meanings, use visuals and graphic organizers to help convey meaning, provide additional review of vocabulary, and work with shared cognates, when appropriate.</p> <ul style="list-style-type: none"> <li>• For ELLs, teachers provide students with structured opportunities to use language in ways that promote accurate grammar and syntax in meaningful contexts.</li> </ul>
<p><b>Print Awareness</b></p> <ul style="list-style-type: none"> <li>• Adults expose children to print in the environment.</li> <li>• Adults model the conventions of print in their everyday activities.</li> <li>• Adults read books to children to enhance these skills: front/back of book, turning pages, and tracking left to right.</li> <li>• Adults provide opportunities for children to practice “pretend” reading, to read environmental print, to recognize their first name in print, and to read familiar sight words.</li> <li>• Adults engage children throughout the day in a variety of playful, interactive activities using materials and practices that are research-based and that are aligned with</li> </ul>	<p><b>Print Awareness</b></p> <ul style="list-style-type: none"> <li>• Teachers work to help students develop an understanding of the conventions, purpose and functions of print. <ul style="list-style-type: none"> <li>◦ Basic print awareness skills to be mastered in the beginning stages of reading (Kindergarten and early Grade 1).</li> </ul> </li> <li>• Based on identified need, teachers provide explicit and systematic instruction in print concepts to ELL students whose first language is non-alphabetic and/or uses different writing systems or different directional conventions.</li> </ul>	<p><b>Print Awareness</b></p> <ul style="list-style-type: none"> <li>• Basic print awareness is typically developed in the primary grades, but in the rare instances when that has not occurred, is addressed through targeted intervention.</li> <li>• For new immigrant ELLs who do not have print awareness in their primary language, teachers with a background in English language development provide engaging age-appropriate and intensive instruction designed to accelerate the development of basic literacy skills.</li> </ul>

# Comprehensive Assessment

**Vision:** Beginning in infancy, children participate in a variety of assessments that monitor their progress and development of language and, later, literacy skills. Educators at the state, district, and school level as well as preschool teachers and daycare providers, are knowledgeable about assessment data and use valid and reliable assessments to inform themselves and others about the development of children's literacy. They ask different questions about assessment results depending on the types of decisions to be made. Educators in schools and districts share assessment results collegially as well as with students and families to help them understand how a student is progressing.

## Quick View of Comprehensive Assessment:

Assessment plays a critical role in instruction in terms of meeting individual needs and providing learning opportunities designed for maximum growth. The blueprint details the following areas of assessment:

- Types of assessments
- Administration of assessments
- Using assessments to identify individual student needs
- Management of assessment data
- Appropriate use of assessment results
- Sharing of results

Birth to Kindergarten	Kindergarten to Grade 5	Grade 6 to Graduation
<b>Comprehensive Assessment</b>		
<b>Type of Assessments</b> <ul style="list-style-type: none"><li>• Districts, schools, early care and learning programs use a variety of universal screenings and assessments that include parent and caregiver observations and experiences.</li><li>• Screening measures for 3-5 year olds include the following:<ul style="list-style-type: none"><li>○ Expressive and receptive language.</li><li>○ Vocabulary.</li></ul></li></ul>	<b>Type of Assessments</b> <ul style="list-style-type: none"><li>• Districts and schools use a variety of universal screeners, diagnostic assessments, progress-monitoring tools, informal assessments and state outcome assessments for specific purposes and to address different questions.</li><li>• Screening measures include early literacy skills for kindergarten and first grade and fluency and comprehension for students in</li></ul>	<b>Type of Assessments</b> <ul style="list-style-type: none"><li>• Districts and schools use a variety of universal screeners, diagnostic assessments, progress-monitoring tools, informal assessments, and state outcomes for different purposes and to address different questions. Compared to the elementary grades, there is even more variation in the type of assessments used because of the different types of literacy</li></ul>

<ul style="list-style-type: none"> <li>○ Engagement in appropriate social conversation and conventions.</li> <li>○ Phonological awareness.</li> <li>○ Knowledge of the alphabet.</li> <li>○ Interest in and awareness of books.</li> <li>○ “Reading” pictures.</li> <li>○ Retelling stories.</li> <li>○ Making predictions.</li> <li>○ Drawing or writing.</li> </ul> <ul style="list-style-type: none"> <li>• Children are screened in their primary language.</li> </ul>	<ul style="list-style-type: none"> <li>• second grade and beyond.</li> <li>• For ELLs, primary language literacy is assessed, when appropriate, and considered when making placement decisions.</li> <li>• For all ELLs, progress-monitoring includes monitoring of progress in English language development.</li> </ul>	<ul style="list-style-type: none"> <li>demands in different disciplines.</li> </ul> <ul style="list-style-type: none"> <li>• Screening measures include fluency screening measures of all students who do not pass the state reading assessment or who transfer in without comparable test scores.</li> <li>• For new immigrant ELLs, primary language literacy is assessed, when possible, and considered when making placement decisions. # Leadership

**Vision:** *The State Board of Education and Early Development promotes literacy initiatives for all Alaska children from birth to graduation. EED works collaboratively with communities, other state agencies, technical assistance providers, early care and learning providers, families, and resource and referral agencies and other statewide partners to provide information and technical assistance that ensures the Alaska Birth to Graduation State Literacy Blueprint is implemented so all Alaska children are able to read for meaning and express themselves both orally and in writing. Regional and local collaboration focuses on ensuring that the blueprint is supported and successfully implemented.*

## Quick View of Leadership:

*In order to be effective, leadership at all levels must be informed and collaborative. The blueprint addresses the following areas of leadership at the state, district, and school/community levels:*

- Organizational culture
- Allocation of resources
- Alignment and coherence of efforts
- Building capacity for effective implementation

Birth to Kindergarten	Kindergarten to Grade 5	Grade 6 to Graduation
<b>Leadership: State Level</b>

# Family & Community Engagement

**Vision:** All around them, young people see the value their community places on literacy. Fluent adults tell stories, think, read, and write in the home and community, modeling these skills daily. Role models representing the diverse community read for children and demonstrate a love of reading. Families, schools, and communities honor and encourage students' interests in reading and writing. Childcare providers and educators are familiar with the literacy practices, cultural values, and local knowledge of the communities and families of their students. Community organizations collaborate to provide resources and supports for literacy. Businesses, community agencies, and local universities communicate with schools to support and develop the literacy skills that young people will need beyond high school.

## Quick View of Family & Community Engagement:

Families and the community play critical roles in developing and supporting the literacy achievement of young people. The blueprint specifically addresses the following areas of engagement:

- Family outreach
- Community partnerships to support literacy
- Creation and support of literate environments in homes and the community
- Collaboration with post-secondary institutions of learning
- Supporting primary language and home culture

# Professional Development

**Vision:** The State Board of Education & Early Development approves teacher preparation programs that produce graduates who understand and use student performance data in order to provide explicit and systematic instruction in reading and writing skills. EED works collaboratively with statewide agencies, consortia, and collaboratives to ensure the effective implementation of the Alaska Birth to Graduation State Literacy Blueprint and literacy initiatives in schools and districts. Childcare providers and educators participate in on-going professional development. The responsibility for the provision of ongoing, high quality professional development is shared by the state, the district, the school and/or local childcare programs. The content of professional development is research-based and focused on the literacy needs of children, as well as on the effective use of data to understand those needs. Professional development is designed to promote collaboration and professional conversations that create effective learning communities and promote a climate of excellence. The schools and districts function as effective learning communities and support a climate conducive to excellence.

## Quick View of Professional Development

*Professional development at multiple levels is key to successful implementation. The blueprint details the following aspects of professional development:*

- Multiple delivery methods to meet various needs
- Allocation of resources for success
- Content of professional development
- Specific focus on the comprehensive assessment system

## Appendix A

### Glossary

Academic Language	The language students must learn to participate fully in the classroom and to read challenging text. In contrast to conversational language, academic language includes longer sentences, uses a more complex and specific vocabulary, and more complex sentence structures.
Accuracy and Automaticity in Reading	The decoding of words accurately and automatically, without (or with minimal) use of students' limited attention or conscious cognitive resources (Rasinki, T.).
Achievement Gap	The Achievement Gap is the difference in performance between low-income and minority students compared to that of their peers on standardized tests (Education.com).
Alaska Early Childhood Coordinating Council	Established by Governor Parnell, the purpose of the AKECCC is to promote positive development, improved health outcomes, and school readiness for children prenatal through eight in the state by creating a culturally responsive, comprehensive, and accessible service delivery system that links service providers, empowers families, and engages communities. The AKECCC shall support the creation of a unified, sustainable system of early care, health, education, and family support for young children and their families. The AKECCC shall facilitate the integration and alignment of services, planning efforts, resources, policy development, and funding as well as establish connections between health, mental health, education, and family support systems and public and private partners.
Alignment	The process of linking content and performance standards to assessment, instruction, and learning (CRESST).
All Children	Includes children with developmental delays or disabilities, children whose families are culturally and linguistically diverse, children from diverse socioeconomic groups, and other children with individual learning styles, strengths, and needs. (From the National Association for the Education of Young Children.)
Allocated instructional time	Time specifically dedicated to an area of study.
Articulation	A seamless, unified transition from one part of the education system to the next (e.g. from elementary to middle school) especially with regard to the curriculum.
Assessment	Assessment is the process of gathering and discussing information from multiple and diverse sources in order to develop a deep understanding of what students know, understand, and can do with their knowledge as a result of their educational experiences; the process culminates when assessment results are used to improve subsequent learning (Teaching Effectiveness Program).
Assessment literacy	Knowledge about the basic principles of sound assessment practice, including terminology, the development and use of assessment methodologies and techniques, familiarity with standards of quality in assessment (Assessment Terminology: A Glossary of Useful Terms).
Best practices	Strategies, activities or approaches that have been shown through research and evaluation to be effective and/or efficient and are the most current.
Building capacity	Building abilities, relationships and values that will enable organizations, groups and individuals to improve

	their performance and achieve their development objectives (UNEP).
Caregiver	Parents, adoptive parents, and other significant adults who serve as the primary caregiver to young children.
Coaching	Provides ongoing consistent support for implementation and instruction. It is nonthreatening and supportive – not evaluative. It gives a sense of how good professional development is (IRA).
Coherence	The relationships that link the ideas in a text to create meaning for the readers.
Collaborative learning	Collaborative learning is based on the idea that learning is a naturally social act in which the participants talk among themselves (Gerlach, 1994). It is through the talk that learning occurs.
Collaborative planning	Collaborative planning involves a group, team, or partnership of people working and learning together to do the following: <ul style="list-style-type: none"> <li>• Plan curriculum, units, or lessons including classroom-based assessments</li> <li>• Examine student work</li> <li>• Examine teacher work</li> <li>• Plan use and evaluation of instructional practices</li> <li>• Develop school improvement plans using student data</li> </ul> (ASCD)
Collaborative writing	Uses instructional arrangements in which adolescents work together to plan, draft, revise, and edit their compositions (Writing Next).
Comprehension	The reconstruction of the intended meaning of a communication; accurately understanding what is written or said (Harris, L. & Hodges, R.)
Comprehensive Literacy Instruction	Instruction that integrates reading, writing, listening, speaking, language, and technology across all content areas to promote critical thinking and learning.
Content area literacy	The level of reading and writing skill necessary to read, comprehend, and react to instructional materials in a given subject area (Handbook of Reading Research).
Content specific text	Text specific to a content area, such as math or Biology.
Content teachers	Teachers of content area classes, such as math or Biology.
Core curriculum	A predetermined body of skills, knowledge, and abilities taught to all students (Funderstanding).
Cultural literacy	Culturally literacy is the ability to understand and appreciate the similarities and differences in the customs, values, and beliefs of one's own culture the cultures of others (NCREL).
Curriculum	Anything and everything that teaches a lesson, planned or otherwise (Wilson).
Data-based decision making	Using and analyzing available information, such as test results, to make decisions about the direction and efficacy of aspects of the educational program.
Decoding	The ability to translate the alphabet letters into recognizable sounds and to use that knowledge to sound out and pronounce words (Naperville Community Unit School District).
Developmental delay	Any significant lag in a child's physical, cognitive, behavioral, emotional, or social development, in comparison with norms (Encyclopedia of Children's Health).
Developmental disability	A severe, chronic disability of an individual 5 years of age or older that: <ol style="list-style-type: none"> <li>1. Is attributable to a mental or physical impairment or combination of mental and physical impairments;</li> <li>2. Is manifested before the individual attains age 22;</li> <li>3. Is likely to continue indefinitely;</li> <li>4. Results in substantial functional limitations in three or more of the following areas of major life activity:</li> </ol>

	(i) Self-care; (ii) Receptive and expressive language; (iii) Learning; (iv) Mobility; (v) Self-direction; (vi) Capacity for independent living; and (vii) Economic self-sufficiency. 5. Reflects the individual's need for a combination and sequence of special, interdisciplinary, or generic services, supports, or other assistance that is of lifelong or extended duration and is individually planned and coordinated, except that such term, when applied to infants and young children means individuals from birth to age 5, inclusive, who have substantial developmental delay or specific congenital or acquired conditions with a high probability of resulting in developmental disabilities if services are not provided (Federal definition).
Developmentally appropriate practice	The teacher, school, or school district's selection of carefully selected curriculum based on the student's reasoning, communication, and interpretation skills, and on the student's ability to focus and interact in the classroom. These abilities and skills change over time, as students mature and develop. The selection of course content, instruction, and assessment techniques are important to maximize each student's potential in the classroom (Education.com).
Diagnostic assessment	An individually administered assessment designed to identify strengths and needs of a student (McKenna and Stahl, 2008).
Differentiated instruction	Procedures for assisting students in learning, providing options, challenging students, and matching resources to students to maximize their learning (Tompkins, G.).
Direct instruction	Taking students through the steps of learning systematically, helping them see both the purpose and the result of each step (Purdue University).
Disciplinary literacy	The specialized skills and codes that someone must master to be able to read, write, and think in the various disciplines (science, math, literature, history) and technical fields (Shanahan).
Discussion protocol	An organized method and set of rules for classroom discussion designed to maximize student learning and participation.
Diverse learners	Learners requiring additional support in the learning process (e.g. special education, English language learners, gifted, etc.)
Early Learning Guidelines	A resource development by the State of Alaska to provide guidance on children's development and learning.
Early Literacy	What children know about reading and writing before they actually learn to read and write. (NICHD definition)  The process of building cognitive, language, and social-emotional skills needed for efficient reading skills. (Dr. Gabrielle Miller definition)
Engaging texts	Books that capture a reader's attention or imagination.
English language learners (ELL)	A person who is in the process of acquiring English and has a first language other than English
Environmental print	The print of everyday life, such as road signs and menus.
Evaluation	The systematic collection and analysis of data needed to make decisions.
Evidence-based practices	Practices for which original data have been collected to determine the effectiveness of the practice for students with disabilities (The Access Center).
Expert opinion	When a person's education, training, and experience provides an assessment, opinion, or judgment within the area of his or her competence, which is not considered known or available to the general public.
Explicit and systematic instruction	Explicit instruction and systematic refer to an instructional practice that carefully constructs interactions between students and their teacher. Teachers clearly state a teaching objective and follow a defined instructional sequence. Students move through the curriculum, both individually and in groups, repeatedly practicing skills at a pace determined by the teacher's measurement of student needs and progress (Swanson,

	2001).
Expressive and receptive language	The ability to convey (expressive) and take in and interpret (receptive) desired information.
Extension activities	Activities beyond the instructional time designed to reinforce student comprehension and other skills taught during that instructional time.
Family culture	The beliefs, traits, attitudes, ideas and ideals, and environment, which a person inherits or is influenced by his/her parents and ancestors.
Five areas of reading	Fluency, Phonics, Phonemic Awareness, Reading Comprehension, and Vocabulary
Flexible grouping	A method of splitting students into groups for class activities based on specific goals, interests, and learning needs, rather than grouping the students by ability (Education.com).
Fluency	Reading smooth, quickly, and with expression (Tompkins, G.).
Formative assessment	Assessment that may occur during the process of a unit or course intended to foster development and improvement within an ongoing activity or may occur in the form of an observation by the teacher of the student's progress.
Genre	A distinctive type of category of literary composition such as poetry, drama, or biography.
Graphic organizers	A visual representation of what the student is learning.
Guided practice	A teaching strategy used to reinforce and practice previous learning with the teacher or other (e.g. computer) as support to the student, making sure the concept or skill taught is understood and practiced correctly.
High quality professional development	A comprehensive, sustained, and intensive approach to improving teachers' and principals' effectiveness in raising student achievement (NSCD).
Infant Learning Program	One of Alaska's leading resources on the first three years of life. Its aim is to strengthen and support families to promote the healthy development of infants and toddlers with special needs.
Inquiry activities	Activities that engage students in analyzing immediate, concrete data to help them develop ideas and content for a particular writing task (Writing Next).
Intervention	Services provided for a student that may modify the original curriculum, teaching approach, or group size to meet an individual's needs. The modifications may take many forms but usually will adjust the frequency, duration, and/or intensity of the service.
Job embedded professional development	Professional learning that occurs during the course of the usual activities of an educator's workday.
Kinesthetic learning	A learning style in which learning takes place by the student actually carrying out a physical activity, rather than listening to a lecture or watching a demonstration.
Literacy	The ability to identify, understand, interpret, create, communicate, compute and use printed and written materials associated with varying contexts. Literacy involves a continuum of learning in enabling individuals to achieve their goals, to develop their knowledge and potential, and to participate fully in their community and wider society (The United Nations Educational, Scientific and Cultural Organization definition).
Literacy center	Literacy centers are areas in the classroom designed to allow students time for independent reading and writing practice. They are used to reinforce specific concepts. Literacy centers should contain meaningful, purposeful literacy activities that can be done individually or in small groups.
Literacy coach	A highly trained, school-based teacher who engages colleagues in collaborative problem-solving and inquiry-oriented conversations in order to change instructional practices that improve student achievement (Lyons, C. and Pinnell, G.).

Local Education Agency (LEA)	Local school districts.
Master schedule	The schedule of classes in a school.
Modeling	The act of a teacher or student serving as an example of a behavior from which other students can emulate or learn (Education.com).
Narrative skills	The ability to describe things and events and to tell stories.
Oral comprehension	Understanding what is heard.
Oral language	The expressive (speaking) and receptive (listening) aspects of language.
Organizational culture	The set of beliefs, values, and norms, together with symbols like dramatized events and personalities that represents the unique character of an organization, and provides the context for action in it and by it (G. Morgan).
Outcome assessment	A process conducted to gauge a program's educational quality and to engage into continual teaching and learning improvement (Makteam).
Peer observations	When people are observed by someone at the same level, usually meaning a fellow teacher rather than an administrator. The person who observes then gives feedback to the one observed.
Performance-based assessment	Direct, systematic observation of an actual student performance or examples of student performances and rating of that performance according to pre-established performance criteria (Weins, M.S.).
Phoneme	The units of speech that make up words.
Phonemic awareness	The understanding that spoken language is composed of phonemes, or speech sounds. It involves the ability to blend, segment, and manipulate phonemes in spoken words. It is an auditory process that does not involve the use of print (CORE – Teaching Reading Sourcebook).
Phonics	The connection of the sounds of spoken English with letters or groups of letters and the blending of the sounds of letters together to produce approximate pronunciations of unknown words (International Communication Learning Institute).
Phonological awareness	Involves the ability to notice, or manipulate, the individual sounds in words.
Play (interactive/cooperative)	Play is a vehicle for a child's development, strengthens cognitive capacities, including sustained attention, memory, logical reasoning, language and literacy skills, imagination, creativity, understanding of emotions, the ability to reflect on one's own thinking, restrain impulsivity, control one's behavior, and take another person's perspective.
Primary language	The language first taught and most used in the home.
Professional development	A comprehensive, sustained, and intensive approach to improving teachers' and principals' effectiveness in raising student achievement (Learning Forward).
Professional Learning Communities (PLCs)	Teams of educators systematically working together to improve teaching practice and student learning. Research suggests that such learning communities are characterized by the following: <ul style="list-style-type: none"><li>• supportive and shared leadership</li><li>• shared values and vision</li><li>• collective responsibility for students' learning</li><li>• the promotion of personal reflection and team collaboration</li><li>• supportive physical and personal conditions</li></ul> (Education World)
Progress monitoring	The process of collecting and evaluating data to make decisions about the adequacy of student progress toward

	a goal (Center on Instruction).
Prosody	This component of reading fluency stresses the appropriate use of phrasing and expression (Rasinski, T.).
Rate	The speed at which a person reads, generally measured as words per minute or words correct per minute (NECAP).
Revised Alaska Developmental Profile (RADP)	Required by the state for all children entering kindergarten or first grade for the first time. The purpose of the profile is to identify, record, and summarize the skills and behaviors students demonstrate. The RADP correlates to thirteen specific goals of the Alaska Early Learning Guidelines, five of which are literacy related.
Reciprocal conversations	Two-way conversation in which both parties practice active listening and reflection.
Retelling	Post-reading or post-listening recalls in which readers or listeners tell what they remember (Kalmbach, 1986).
Rubric	An established set of criteria for scoring or rating students' performance on tests, portfolios, writing samples, or other performance tasks (Weins, M.S.).
Running records	An assessment tool used to monitor and analyze a student's reading process by recording the reader's oral reading exactly as it is performed (Education.com).
Scaffolded instruction	Instruction builds upon prior knowledge of a concept, or part of that concept, when introducing new information to increase the student's level of understanding of the new concept.
Scientifically-based research	<p>Data exist that show improvement for students who used the program compared to students who did not use the program.</p> <ul style="list-style-type: none"> <li>• Applies systematic, empirical methods of data collection drawing on observation and/or experimentation.</li> <li>• Uses measurements or observation that provides reliable, valid data.</li> <li>• Involves rigorous data analyses, testing hypothesis and justifying conclusion.</li> <li>• Ensures the studies are presented with detail and clarity to allow for replication.</li> <li>• Accepted by a peer-reviewed journal or panel of independent experts.</li> </ul> <p>(NCLB)</p>
Screening assessment	Screening is a method of data collection for determining how each student is performing in a given area, compared to peers of their age. It is an initial step in instructional decision-making and is critical to identify needs early.
SEED Early Childhood Professional Development Plan	The plan is intended for multiple sectors of the early care and education workforce including child care, Head Start, pre-kindergarten, early intervention and home visitor programs. Aspects of the plan may also be useful for school-age care and friend, family and neighbor care. This plan will be useful for all people who work with young children, though it may not be their primary profession. This could include community groups, parents, volunteers, religious organizations and others. In addition to those who work in the childcare workforce, policy makers and administrators will benefit from the articulation of a professional development plan as they seek to make decisions that benefit young children in Alaska.
SEED Registry	The SEED Registry is Alaska's recognition system for Early Childhood Educators. As a core component of Alaska's System for Early Education Development (SEED), the Registry provides the vital link between various

	<p>aspects of the Professional Development System within Alaska. The Registry has four main purposes that will help to improve the field of early care and education standards:</p> <ul style="list-style-type: none"> <li>• Collecting statewide data on our workforce</li> <li>• Bringing recognition and professionalism to the field of early care and education</li> <li>• Informing policy makers about the early care and education workforce</li> <li>• Tracking individual advancement on the Early Childhood Professional Development Framework for practitioners</li> </ul>
Self-directed learning	Self-directed learning is the method used when a learner, rather than an institution, controls both the learning objectives and the means of learning. It is a continuous process, often informal, and an important factor in lifelong learning (Spears).
Sentence combining	Involves teaching students to construct more complex, sophisticated sentences (Writing Next).
Shared leadership	A partnership model wherein all stakeholders (students, parents, teachers, administrators) become school leaders in some ways and at some times as the school moves forward together toward the accomplishment of a shared goal (Moxley, 2000).
Social language conventions	Shared meaning around the words associated with conversations.
State Education Agency (SEA)	The Alaska Department of Education and Early Development
Summarization	Involves explicitly and systematically teaching students how to condense large amounts of text into several key concepts.
Summative assessment	The final evaluation of the degree to which the goals and objectives of a program have been attained (Harris, T. and Hodges, R.).
Tiered instruction and intervention	A model in which the instruction and interventions delivered to students varies on several dimensions that are related to the nature and severity of the student's difficulties (RTI Action Network).
Universal screening	A process in which all students are assessed to identify those at risk for failure.
Vocabulary	The words we must know to communicate effectively (NICHD).
Writing process	A process that interweaves a number of writing instructional activities in a workshop environment that stresses extended writing opportunities, writing for authentic audiences, personalized instruction, and cycles of writing -- pre-writing, planning, drafting, revising, editing (Writing Next).
