Assessment Design Cycle
From Pilot to Adoption

1. Establish purpose and blueprint for assessment
2. Select items aligned to standards and learning targets
3. Create and pilot draft assessments
4. Collaboratively score pilot assessments
5. Use sample student responses to refine and revise assessments/rubrics
6. Develop scoring guides that include anchor sets/exemplars
7. Administer the revised assessments
8. Collaboratively score the assessments using scoring guides & anchors
9. Analyze data/assessment results
10. Further refine assessment, administration, scoring & reporting procedures
11. Adopt assessment into local assessment plan
